(changes.rss)

1. Version 0.6.2 (2005-05-13)

- Added an Unused Class report to identify possible unused code. (DCA)
- Added JUnit test source and executables to the build distribution. (DCA)
- Bug in Sequence Flow report that was producing an ArrayStoreException when analyzing some applications(DCA)

2. Version 0.6.1 (2005-03-23)

- Enhanced the Sequence Flow report (HTML output) to show multiple levels of method calls. (DCA)
- Bug in Sequence Flow report that was suppressing called method references (HTML format only).(DCA)

3. Version 0.6.0 (2005-03-16)

- Sample reports to the documentation.(DCA)
- Enhanced the complexity report to include cumulative statistics for packages and classes as well as a textual explanation of the WMC metric. (DCA)

4. Version 0.5.9 (2005-03-14)

- Documentation enhancements.(DCA)
- Added generated date and labels to report output.(DCA)
- Changed the name of the Activity Flow report to Sequence Flow. Made the intent of the report clearer as it provides information found in a UML sequence diagram. (DCA)

5. Version 0.5.8 (2005-03-11)

- Null pointer exception generated on the activity report for classes in the default package. (DCA)
